

Disk Encryption

Encryption manager for mobile storage devices
Complete protection for sensitive data

The Encryption Manager offers highly secure protection of your data and ensures compliance with data protection guidelines and other security standards.

On one hand, encryption is crucial due to the growing legal demands of global data protection regulations like GDPR. On the other, hackers continuously develop new methods to access unsecured data.

In our digital world, data is frequently targeted by cyberattacks. The Encryption Manager for xSTORAGEs provides reliable protection by making encrypted data unreadable and worthless to third parties.

Password protection (PSK)

- Password assignment to en/disable encryption
- Automatic activation when disconnected or turned off
- Ideal for mobile devices at risk of loss or theft

Simple setup and management

- Combines security and simplicity
- Designed for straightforward setup and management
- Features a user-friendly GUI
- Offers implementation of scripts via CLI

Maximum write performance

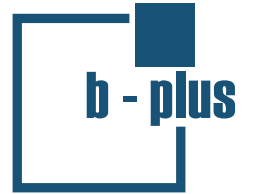

- No loss of sustained write speed during encryption
- Developed according to the OPAL standard of the TCG
- Provides AES-256 encryption on a hardware basis

Compatible Hardware Platforms

- BRICK2 STORAGE NVMe
- x8 STORAGE – Gen3 E1.S
- x8 STORAGE – Gen4 E1.S
