CONIX TESTFLEET SOLUTION

The smart cloud-based software solution for managing
your test vehicle fleet

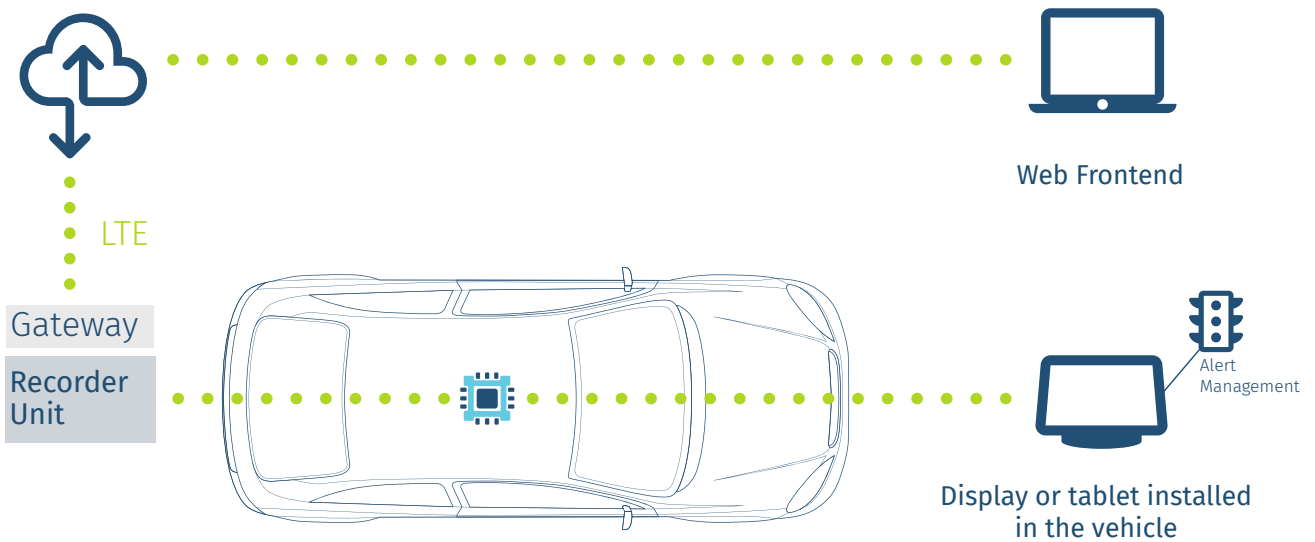

+ CONiX Testfleet Solution

The smart cloud-based software solution for managing your test vehicle fleet

The CONiX Testfleet Solution was developed specifically for test vehicles in the field of validation and supports you with the

- + structured preparation & organization of entire fleets
- + execution of test and validation drives
- + comprehensive evaluation & detailed analysis of test drives and associated data

+ Remotely monitor measurement technology, sensors and vehicle systems of your test vehicles now

We create the optimal interface between the test drivers, the fleet managers and the developers

Your benefits as a **test fleet manager**

- + Reduce administrative overhead of test fleets
- + Create and assign vehicles, fleets and individual components
- + Plan campaigns, tasks and test drives clearly
- + Get an overview of completed, ongoing and upcoming test drives
- + Vehicle status can be checked at any time
- + Interface to the test driver via chat

Your benefits as a **test vehicle driver**

- + Prevent downtime of the measurement technology
- + Get an overview and transparency of the condition of the test vehicle
- + Effective execution of test drives and dedicated scene drives
- + Interface to the manager via chat
- + Convenient tagging of trips (e.g. location, weather bindings, etc.)

Your benefits as a **developer** of new driving functions

- + Generated metadata supports dedicated data search of large volumes of data
- + Identify and visualize causes
- + Software status of the measurement technology, sensors and control units can be read out remotely
- + Software updates for all in-vehicle measurement components and ECUs via OTA

Now discover the wide range of **functions** that will increase the **efficiency** of your fleet in many **different application** areas!

Locating the vehicles

Display of the vehicle status

- + Detect system failures immediately
- + Prevent downtime

Data exchange between vehicle and backend

- + Live transfer of individual metadata and files
- + Configuration of the test setup
- + Execution of updates
- + Minimization of maintenance efforts

Test Drive Management

- + Get an overview of test drives
- + Quick evaluation of the quality of the test drive

Labelling

- + Individual generation of relevant metadata
- + Immediate information on driving scenes

Component Management

- + Get an overview of the vehicle setup
- + Minimize administrative efforts

Version Management

- + Detection of obsolete/wrong system states
- + Preventing test drives with incorrect software states

Issue Tracker

- + Minimization of error states
- + Minimization of administrative efforts

Campaign Management

- + Planning of dedicated driving campaigns
- + Evaluation of the campaign goals

Additional functions of the software solution:

- + Fleet Management
- + Vehicle Management
- + Drive Evaluation
- + Data Transfer
- + Health-Monitoring
- + Task Management
- + Event Management
- + Agent Management
- + User Management
- + Chat
- + Shift Management
- + Storage Management

+ Time and cost savings during the development of your systems

Preparation

Localization, vehicle status, updates and configurations

Implementation

Tracking of test campaigns, route tracking, detection of errors

Evaluation

Data analysis, filtering, campaign evaluation, reports

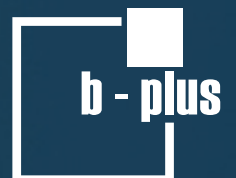

We support with **tools** and **know-how**.

You develop the **function**.

The world is experiencing the **solution**.

Pioneering New Mobility

+ What sets us apart?

b-plus combines two major areas of expertise:
software solutions and hardware expertise

Customers describe us as
exceptionally reliable and flexible

As a **member of various committees**, we work independently and technology-driven on standard-oriented solutions for highest compatibility

With **cloud specialists** we ensure a secure and protected data transfer

Benefit from our **extensive experience for customer-optimized cloud solutions**

Create a **smart interface**
between your **testsystem**
and the **cloud**
